

The Friend View is where a User will go to view another player's profile. This screen will display all of the stats/information that the player does not hide using security. This screen will only have read privileges and not allow the user to edit the information. The top of the page contains the main info about the player's profile. (1) The profile image will be set by the player to make them differentiable from other players. (2) The User info will be the basic info the player chose when they set up their account. (3) The rating buttons will allow other players to judge the overall value that the player brings to the table. (4) Adding this player as a friend is as simple as pressing this button. (5) When the messaging button is pressed the app will go to the messaging page with only this player. (6) The achievement list will contain all of this player's accomplishments. (7) The player will have achievements they have earned and will be in full color when unlocked. (8) However when they haven't earned one they will show locked and not viewable.

User Profile Admin View

1) Profile Pic

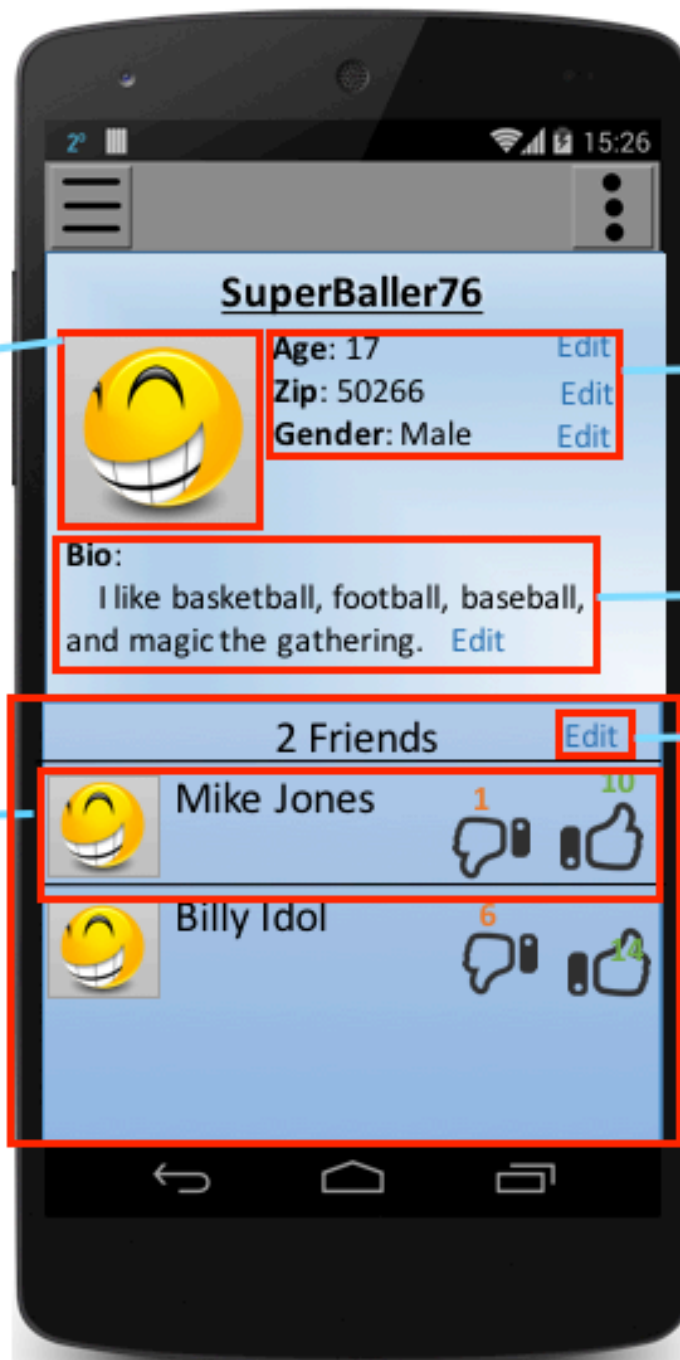

2) Basic Info

3) Biography

5) Friend Edit

4) Friends List

6) Friend

The User Profile Admin View is used by the admin user to edit his profile. This page is important because each user will need to have complete control of what others can see. (1) The profile pic can be changed by pressing the icon. (2) The basic info section will contain all of the small factors a player will enter. (3) The biography is where the user can put his own interests and other descriptive things. (4) The friends list is where each one of your current friends can be added and deleted by the edit button (5). (6) The friend is where you can click to quickly view your friends info or upon selection, go to his profile page.
